

Elvis Haveriku

CYBERSECURITY ANALYST

PROFILE

Aspiring Cybersecurity Analyst transitioning from a finance background, eager to apply analytical skills to security monitoring and threat detection. Currently developing expertise in incident response, log analysis, and threat intelligence. Gaining hands-on experience with SIEM tools like Splunk to identify and mitigate security risks. Passionate about protecting networks and responding effectively to cyber threats.

WORK EXPERIENCE

DATA ENTRY SPECIALIST

2021 to 2023 - We Are Fiber

- Managed data entry and validation using Excel ensuring accuracy.

BOOKKEEPER

2016 to 2021 - "HAVERIKU-97" sh.p.k.

- Prepared tax declarations, payrolls, and helped with financial reports.
- Managed sales and purchase records.

BANK INTERN

2017 - Intesa SanPaolo Bank Albania

- Assisted in the everyday operations in the bank branch.

EDUCATION

2024-2025 | Cybersecurity Training - Becode

2023 | Complete Python Developer in 2023 - Zero to Mastery Academy

2012-2014 | Master in Finance and Accounting - European University of Tirana

2009-2012 | Bachelor in Finance and Banking - European University of Tirana

CERTIFICATIONS

2025 - Microsoft SC-900: Security, Compliance, and Identity Fundamentals

2025 - Microsoft AZ-900: Azure Fundamentals

2025 - TryHackMe: SOC Level 1 Certificate

ACHIEVEMENTS

TryHackMe - Top 1% World Ranking

CONTACT

TECHNICAL SKILLS

Programming and Web Development:

Python, Flask, MySQL, Bash,
Powershell, CSS, HTML

System Administration:

Windows Active Directory
Linux Server

Tools & Platforms:

Splunk, Github, Zeek,
ELK, Burp Suite,
Nmap, Metasploit,
Snort, Wazuh,
Wireshark

SOFT SKILLS

- Critical thinking
- Teamwork
- Time management
- Dedication
- Solution oriented

LANGUAGES

- Albanian (Native language)
- English: C2
- French: A2
- Italian: B2

CYBERSECURITY PROJECTS

COMMAND AND CONTROL SERVER CREATION AND TRAFFIC DETECTION

- Created an isolated virtual lab with Kali Linux (attacker), Windows 10 (victim), and Ubuntu (Splunk SIEM) using VirtualBox and internal networking.
- Simulated adversary command and control (C2) traffic using MITRE Caldera and deployed beaconing agents on the victim endpoint.
- Configured Splunk with Sysmon log ingestion for real-time detection and analysis of malicious network and host activity.

AUTOMATED WEB SECURITY RECONNAISSANCE

- Utilized Subfinder for discovering subdomains and Nuclei for vulnerability scanning.
- Developed a Python script to detect missing security headers on multiple domains.
- Implemented logging and low-noise scanning to enhance efficiency and reduce detection risks.

FLASK SERVER CONTACT FORM

- Developed a web-based contact form using the Flask framework in Python.
- Applied validation and sanitization to ensure secure and accurate user input.

PHISHING WEBSITE SERVER

- Created a Flask-based malicious web application designed to capture user login credentials through a login form.
- Deployed the website online using Ngrok to simulate a phishing attack environment.
- Security Risk Demonstration: Showcases the risks of unprotected login forms and the importance of secure coding practices.

CYBERSECURITY PROJECTS

WINDOWS SERVER 2022 ACTIVE DIRECTORY

- Deployed and configured a secure Windows Server 2022 environment with Active Directory (AD) and key server roles including DNS, DHCP, and IIS.
- Integrated users with role-based access.
- Applied granular permissions using Group Policy Objects (GPOs).

LINUX SERVER CONFIGURATION

- Configured a Linux server infrastructure with DHCP, DNS, and Nginx.
- Automated backups and remote management using cron jobs and SSH.
- Implemented partitioned storage and enhanced data integrity with rsync.

NETWORK SECURITY ARCHITECTURE — CISCO PACKET TRACER (GROUP PROJECT)

- Designed a secure network architecture with VLANs and Access Control Lists (ACLs).
- Configured DNS, DHCP, and iSCSI servers for optimized functionality and network efficiency.
